

Fake data

Add dependency of java faker

```
<groupId>com.github.javafaker</groupId>
```

```
<artifactId>javafaker</artifactId>
```

```
<version>1.0.2</version>
```

```
Faker faker = new Faker();
```

```
Var author =
```

```
Author.builder().firstName(faker.name().firstName()).lastName(faker.name().last  
tName()).age(faker.number().numberBetween(19, 50));
```

We can do this under a loop so we will get that much objects.
