Imp Note

Pet-clinic-data/src/main/java/org/example/pratik
Pet-clinic-web/src/main/java/org/example/pratik

Actually we are having 2 modules pet-clinic-data and pet-clinic-web
And in one module we have main class for spring boot.

We have main class of spring boot in one of the folder then also it will scan the root packages of both org/example/pratik
