Maven command line usage

Mvn help:active-profiles ->shows all active profiles
Mvn help:active-profiles -Ppackagecloud
Makes that active also and show active ones.
Mvn clean destroy -Pnexus-dextro
To activate nexus-dextro profile and work with it.

Mvn -P \!packagecloud help:active-profiles
->deactivates that active by default profile.

Mvn clean destroy -P \!packagecloud,nexus_distro

Activates nexus_distro and deactivates package cloud.
