Creating Mockito mocks with annotations

```java
import org.junit.jupiter.api.Test;
import org.mockito.Mock;
import org.mockito.MockitoAnnotations;

import java.util.Map;

public class AnnotationsMockTest {
    @BeforeEach
    void setup(){
        MockitoAnnotations.initMocks(this);
    }
    @Mock
    Map<String,Object> mapMock;
    @Test
    void testMock(){
        mapMock.put("keyvalue","foo");
    }
}
```

We have a mock that will be injected after every test.
